Education

D. Y. Patil International University

Bachelor of Technology in CSE – 7.6 CGPA

September 2021 – August 2024

Pune, Maharashtra

Professional Summary

GenAI and DevSecOps Engineer specializing in agentic AI systems, DevOps automation, and cloud-native infrastructure. Builds production-grade LangGraph multi-agent pipelines and FastAPI backends, automating CI/CD and Kubernetes/Terraform workflows across GCP with a focus on secure, scalable deployment.

Technical Skills

Languages & Tools: Python, Java, SQL, MySQL, Spring Boot, FastAPI, REST APIs, Frontend Development, VS Code

AI & GenAI: LangGraph, LLMs, AI Agents, Prompt Engineering, Agentic AI, Vertex AI, Gemini

DevOps & Cloud: GCP, Docker, Kubernetes, Terraform, Helm, CI/CD, Git, GitHub, Bitbucket, BigQuery

Tools & Concepts: Deployment Automation, Containerization, IAM & Security, Open Source Contribution

Professional Experience

Deutsche Bank

September 2025 – Present

DevOps and AI Engineer

Pune, MH

- **Tech Stack:** GCP, Kubernetes, Helm, Terraform, Docker, BigQuery, Python, Java, GitHub, Bitbucket, CI/CD, IAM, FastAPI, REST APIs, IBM MQ, Linux, Container Security
- Designed and implemented cloud-native infrastructure using GCP, Kubernetes, Helm, Docker, and Terraform, cutting manual deployment effort by **50%+**.
- Provisioned and managed BigQuery datasets, workflows, and IAM configurations, improving data accessibility and governance by **60%**.
- Built and maintained CI/CD pipelines and reusable deployment templates, accelerating release cycles by **35%**.
- Drove end-to-end development and **DEV 1 and 2 go-live** of IntelliOps, an AI-powered operations platform for log analysis and incident investigation.
- Led OSS vulnerability remediation across Critical, High, and Medium findings, improving security compliance by **70%+**.
- Automated platform-wide configuration and secret management via Kubernetes-native solutions, cutting manual operational work by **80%**.
- Collaborated with cross-functional engineering, security, and platform teams to deliver secure, scalable, cloud-native solutions.
- IntelliOps was selected for Deutsche Bank's **Bank on Tech** initiative.

Meritshot

July 2023 – September 2023

Data Science Intern

- Collaborated with a team on case studies, research papers, and technical articles.
- Built **Power BI** dashboards and Python-based analyses for data visualization.

Projects

IntelliOPS AI – Agentic AIOps Platform | *LangGraph, Vertex AI, Python, Kubernetes, GCP, Qdrant*

- Engineered **IntelliOPS AI**, an Agentic AI-powered AIOps platform that acts as a virtual engineer to automate incident investigation and Root Cause Analysis (RCA).
- Designed a **multi-agent architecture** using LangGraph and Vertex AI, integrating specialized agents for Kubernetes, logs, and metrics to enable intelligent troubleshooting workflows.
- Automated analysis of **logs, metrics, Kubernetes events, and cloud resources**, reducing manual investigation effort by **70%+**.
- Implemented Human-in-the-Loop (HITL) approval workflows and Qdrant-based contextual retrieval, accelerating root cause identification by **60%+**.
- Contributed to the PROD deployment and enterprise adoption of the platform, helping reduce MTTR by **50%+**.
- Earned recognition under Deutsche Bank's **Bank on Tech** initiative.

Energy Consumption Monitoring and Visualization | *Python, Jupyter, Data Visualization*

GitHub Link

- Created an energy monitoring system using machine learning to optimize household electricity consumption, reduce costs, and improve efficiency through forecasting, fault detection, and visual analytics.

Certifications

Google Data Analytics Professional Certificate | Data Science and Machine Learning Certificate | Advanced Java Programming
